

LETTLAND

There are two ways of hallmarking articles in Latvia: either by applying –as in Portugal– a combined hallmark comprising both the Assay Office mark and the fineness mark, or by applying two separate marks: one for the Assay Office mark and one for the fineness. Other marks such as the year mark and the registered responsibility mark are struck by the manufacturer on articles produced in Latvia (articles imported into Latvia do not bear a registered responsibility mark).

Assay marks of Republic of Latvia

State guaranty mark

For gold article:

united state guaranty and assay mark
